

## MILITARY PATRIOTIC EDUCATION IS A COMPONENT PART OF THE GENERAL EDUCATION OF YOUTH

**Alinazarov Nasirkhan's son Nadirkhan**

*Student of the Faculty of Military Education of Fergana State University*

**Abstract:** *First of all, any independent country must have a strong army that can defend itself. After gaining independence, we got everything, including our own Armed Forces. In fact, today we have Armed Forces that can protect our country in every way. The brave sons of the Uzbek people are faithfully serving in its ranks. We should be proud of them as much as possible. Because they are the guardians of our peaceful and prosperous life, vigilant defenders of our Motherland. They can be compared to the human heart.*

**Key words:** *Armed forces, welfare, our people, pride, difficulties, our country, service, homeland, protection, providing.*

The unceasing and steady work of the heart is a sign of life, and the unceasing and painstaking service of the military is a sign of the peace of the Motherland and the continuation of our prosperous lifestyle.

Don't forget this old wheel is in the sky,  
Everything is small except for the homeland.  
The sky is as clear as a dream in my heart,  
If the land is not peaceful, love is the rule.  
If you love, love this country first...

It can be seen from these lines of the poet Muhammad Yusuf that we young people should first of all love our Motherland, appreciate peace and protect it. After all, holidays and weddings suit a peaceful country. To understand the homeland, to feel love for it, you need to look at history. After all, in the words of Behbudi, "Mozi is the scale of truth." In order to appreciate independence, peace and well-being, it is necessary to know how these days were reached, how many patriots were martyred, and how much work was done in the name of freedom and liberty.

No wonder many people like Madaminbek, Cholpon, Fitrat, Osman Nasir, Abdulla Qadiri understood what the Motherland is and how sacred it is better than us! Mahmudhoja Behbudi said "Rights are taken, not given!" Abdurauf Fitrat's speech "Let's unite, let's ignore personal disputes and class divisions!" We cannot deny that his calls to unify the nation were, in a certain sense, of great importance

in our achievement of independence. There are several that ensure the independence of any country

there are factors. These are: the army that provides border protection, Constitution, state symbols, flag and national currency

existence. The army that provides our protection - our Armed Forces has become a great force today. The brave boys who are defending our country and people are the children of this country.

Our Constitution, whose 31st anniversary was celebrated widely

we define it as Here is the question "Will there be rules for being happy?" the question arises.

As the state strives for development, it must first of all ensure the well-being of its citizens, legally define their rights and freedoms, and establish a certain order in society and social relations. Everyone should respect and follow these rules. Only then will there be peace in society and peace in the country. If there is peace in the country, if people on this earth live peacefully, that is happiness.

Article 52 of our Constitution states that "Protection of the Republic of Uzbekistan is the duty of every citizen of the Republic of Uzbekistan...". Indeed, the children of this country, whether they are boys or girls, should always be ready to serve our boundless country. After all, our President has great hopes for us, the foundations of the future. We must fully justify this trust, besides, we must protect our Free and Prosperous country like the apple of our eye.

How delicious the word motherland is,

You are worthy of everything, my dear,

Be respectful, every boy and girl.

Dear, precious, great Motherland

Even if I die, I will not leave your arms...

These lines of the poet are involuntarily repeated in the languages of every boy and girl living in Uzbekistan, a country with a great future. The reason for this is the stability of peace and tranquility in our country, the beauty of our country is growing day by day, of course...

What do we mean by "Motherland" and "Patriotism"?

"Motherland" is a sacred feeling that has been refined over thousands of years, inspires the spirit of people, encourages brave men to be brave and, if necessary, to sacrifice their lives for the motherland.

"Motherland" is our family, home, neighborhood, village and city, and, of course, this is our Mother Uzbekistan.

At this point, it is appropriate to highlight the following words from the speech of the first President I.A. Karimov at the 3rd session of the Oliy Majlis of the Republic of Uzbekistan: "In the ideology of our people, our society, the idea of the Motherland I need it. National pride should be the foundation of all our work."

These holy ideas, regardless of nationality and faith, should be absorbed into the life and mind of every person living in this country, every citizen, the biggest support, the biggest trust for each of us, and it should become a true faith.

Only if protecting independence, valuing it, glorifying it, and serving it becomes our national consciousness, our creed, no force can turn us away from our chosen path, nor can it bend us.

These great ideas should be absorbed into the blood and hearts of each of us and become a sacred wealth - a sacred heritage for future generations.

Such ideas fully reveal to us the meaning and essence of the word "Patriotism" and what a "Patriot" should be.

When we hear the words "Patronic" and "Millatsevar", the images of our great ancestors Shiroq, Tomaris, Alpomish, Jalaluddin Manguberdi, Namozbotir and the great master Amir Temur appear before our eyes.

Like them, we will try to be a worthy generation for the Motherland and the Uzbek people.

We bow before Usman Nasir, Fitrat, Cholpon and other great figures of our nation who lived in the recent past, during the time of the Shura government. Their patriotism, bravery, the fact that they sacrificed their lives for the bright future of the Uzbek people, the lives they lived and fought for the development of the nation will remain a school of life - a school of patriotism for the younger generation.

Independence, the creation of an independent sovereign state is the realization of the age-old dream of every nation, its hopes and sacred goals. The people of Uzbekistan declared their state independence on August 31, 1991. Another independent, full-fledged, sovereign state, the Republic of Uzbekistan, appeared on the world map.

The Oliy Majlis of the Republic of Uzbekistan declared September 1, 1991 as Independence Day. From that day on, we fully felt the feeling of Motherland.

The selfless struggle of our people for an independent Motherland came true, and we got our own Motherland, language and religion.

Each generation builds the history and reputation of Elurti with its filial love and faith, loyalty and creativity, tenacity and courage.

Remember:

- The Republic of Uzbekistan is based on four main principles in building and developing a democratic, legal society.

These basics are:

Commitment to universal values;

Strengthening and developing the spiritual heritage of our people;

Free expression of one's capabilities;

Patriotism.

The strength and power of independent Uzbekistan is the loyalty of our people to universal values. Our people have been preserving the tender buds of justice, equality, friendly neighborliness and humanity for centuries. The main goal of modernizing Uzbekistan is to restore these traditions, to give them a new meaning, to create the necessary conditions for achieving peace and democracy, prosperity, culture, freedom of conscience and the development of everyone in our land.

The National Independence Ideology is a set of political, scientific, theoretical, historical, philosophical, artistic and religious views on the achievement of Uzbekistan's independence, an ideological weapon that educates the people in the spirit of confidence and faith in the future, and unites all categories of people towards this goal. 'ayat is a powerful spiritual factor. The main essence of the ideology of national independence is as follows:

inculcating the feelings of trust, love, honesty, patience, justice, and enlightenment into people's minds based on the age-old traditions, traditions, mentality, language, and religious ideas of our people;

through the ideology of national independence, to educate our people, relying on their own power and protection, based on universal values, and striving to occupy an equal and worthy place in the world community, among advanced countries;

forming a healthy, spiritually rich, perfect generation.

The basis of the ideology of national independence is patriotism, freedom, national pride, humanitarianism, and internationalism.

As the first President I.Karimov noted, spiritual and spiritual strength for us in our aspirations to build a free and prosperous Motherland, a free and prosperous life, which is our final goal - the source of power, the scientific basis, it must be a national idea, a national ideology.

Since the first days of our country's independence, special attention has been paid to this issue. Everyone is aware of the work done in order to determine the place of the national ideology in our life, to create its scientific and theoretical

foundations, to develop ideological educational directions, and to form social opinion in our society on this basis.

After all, the state system, its management, and the policy being carried out must first of all be built on the basis of a clearly expressed ideology. It is inevitable that a society that does not rely on its national ideal will face a crisis and lose its way.

It is necessary to inculcate in the mind of every person, especially the young people who are just starting out in life, that it is up to them to achieve the goals set for them, that is, it depends on their unwavering enthusiasm, until They must realize that it depends on their selflessness and endless hard work. The same thing is the main condition for the development of our country and people.

Today, our greatest task and sacred duty is to open a worthy page in the history of Uzbekistan and fill it with noble and meritorious deeds that will serve as an example for our generations.

Based on these great goals, we should define our main tasks. The main task of us, that is, the teachers of future military training, is to be someone who loves this independent Motherland with all his heart, who is ready to sacrifice his life for its development and freedom, and for its people, as a nation. is to bring up brave boys, Uzbek patriots, who are burning for their country.

This education, of course, should be carried out in an integral connection with moral, labor, aesthetic, spiritual and physical types of general education.

Among the types of education mentioned above, military-patriotic education occupies an important place. Military-patriotic education should educate young people in the spirit of loyalty and love for the Motherland, its glorious history, peace-loving and creative people.

Before the call-up, students acquire the knowledge, skills and abilities necessary for their future service in the Armed Forces and the defense of our Motherland in military-patriotic and mass-defense events. During these trainings and activities, they will receive basic information on the basics of military work and service. Young people deeply study the history of our Armed Forces, its activities in protecting the independence of our Motherland today, the types of Armed Forces and their tasks, the procedures for serving in the Armed Forces and many other necessary knowledge.

Thus, preliminary preparatory training and public defense events before the Convocation are of great importance in the military-patriotic education of young people and constitute the main core of the program of preparing them for the defense of the Motherland.
