

THE ROLE OF EDUCATION AND EDUCATION IN RAISING THE SPIRITUALITY OF YOUTH

Mamayusupova Charos

Student of school 26, Termiz city

Abstract: *In this article, the youth, who are the future of our country, are to be educated spiritually, morally and physically, and to make them active participants in the ongoing reforms. The solution to the socio-political and cultural-educational tasks facing our country was discussed and recommendations were made.*

Key words: *Spirituality and enlightenment, culture, tradition, opportunity, state policy on youth. The fate of our country, the future of our people, and the sustainability of our independence depend directly on our youth, who are the backbone of our country.*

Young people are the sustainers of our lives and the foundation of our future. Because the biggest strength and potential of our country is our youth. A country with young people prospers and flourishes. A great future can be built only by young people who are brave and courageous, who have faith in their eyes, fire in their hearts, and kindness in their hearts. Only educated, potential, spiritual, self-confident, healthy young people will continue tomorrow. An independent country is built only by a healthy generation. Youth is the most delicate period of a person's life and the time at the crossroads of life's paths. If a person gets on the right path at that crossroads, he, his family, his relatives, his people, etc., will be turned away. It should be noted that the growth and development of our country is due to the peace and tranquility prevailing in our country, and peace does not happen by itself. It is one of the important tasks of today to tell our population, especially to the growing young generation, about the great virtues of preserving peace and harmony, being tolerant, and showing kindness to each other. Is one. The future of every country depends on the moral and educational development of young people. The future of the country is bright, its prospects are bright. It consists of cultural and spiritual views, moral values, traditions, and religious and spiritual feelings instilled in a person from a young age. At this point, he feels that he is united with his family, relatives, neighborhood, nation, and country, that he is a part of it. As a result, a sense of national pride and patriotism is formed in his mind and heart. Young men and women make up the majority of the population of our country. Ample conditions have been created for their education and occupation.

At the same time, organization of meaningful free time of young people is an urgent issue. Society cannot achieve its future without developing and strengthening moral values in the minds of young people. The training of a new generation of personnel capable of solving complex and large-scale tasks on the way to modernizing our country and building a modern society will continue to be the most important direction of our activity.

Young people are the future prospects. It is known from the historical development of any country that the rapid development of the country, the achievement of certain achievements, and the well-being of the people depend on the level of attention paid to the education and future of the youth in that country. In this sense, the issue of youth in Uzbekistan is one of the most priority areas of state policy. President Sh. Mirziyoyev said, “The future of our planet and its well-being depend on how our children grow up to be human beings. They emphasize that our main task is to create the necessary conditions for young people to show their potential. After independence, the attention to our youth increased and the door of unlimited opportunities was opened for them. All schools, lyceums, vocational colleges, and higher educational institutions were equipped with modern equipment.

Our young people are making great use of such opportunities and are achieving great heights in all fields, be it learning the secrets of science, choosing modern knowledge and professions, using information and communication technologies, the Internet. In fact, we have such advanced young people that no one can deny that they have more knowledge than professors in many fields. Today’s youth are so demanding and inquisitive that they surprise everyone by making various discoveries. Therefore, in our country, the greatest attention is focused on raising independent thinking, enterprising, enthusiastic young people, and this task is based on the Law of the Republic of Uzbekistan “On State Policy Regarding Youth”, 2017 of the President of the Republic of Uzbekistan No. PF-5106 of July 5, “On improving the effectiveness of state youth policy and supporting the activities of the Youth Union of Uzbekistan”, January 25, 2018, “General secondary, secondary Decree No. PF-5313 “On measures to fundamentally improve the system of special and vocational education”, as well as many decisions and other legal documents related to youth. In particular, it is no exaggeration to say that the adoption of the Law of the Republic of Uzbekistan “On State Policy Regarding Youth” was an innovation in the field of creating legal mechanisms for comprehensive support of young people. It is known that this law consists of 4 chapters and 33 articles, which is implemented by the state and envisages the

creation of conditions for the social formation of young people and the development of their intellectual, creative and other potentials. The norms defined in it ensure the rights and freedoms of young people. Also, in this law, additional measures of state support for young people, state support for gifted and talented young people, youth entrepreneurship, norms for youth social service are reflected. For example, the International Olympiad of Young Mathematicians named after the great scholar Muhammad al-Khorazmi was successfully held in Uzbekistan, as a logical continuation of which Ahmed Farghani in physics, Abu Rayhan Beruni in chemistry, Abu Ali ibn The organization of international science Olympiads named after Mirzo Ulugbek in China and astronomy is to support gifted and talented young people. Here, in practice, the main purpose of introducing state awards such as creativity, presidential schools, specialized schools, the introduction of gold and silver medals, science Olympiad winners, Zulfiya, “Brave Boy”, “Builder of the Future”, the viability of the law and is to ensure its execution. Another important aspect of the law is that it aims to solve important tasks such as creating conditions for young people to engage in entrepreneurship, protecting them from various harmful effects, and early prevention of crimes. In each article of this law, it is necessary to focus on young people, organize activities to raise healthy and well-rounded young people, increase their role and activity in the life of society, support young people socially, science, sports, science. The goal was to implement a number of issues, such as the development of the creative talent of young people in the field of art and culture. Young people are the future bearers, the pride and pride of Uzbekistan. The great future and In our heavenly country, a strong legal framework has been created to protect the rights and interests of young people, to create the necessary conditions and opportunities for them, and this system is being improved in line with the requirements of the times. In particular, more than 40 legal documents related to youth have been adopted by the parliament, and more than 30 international legal documents have been ratified. In general, Uzbekistan is using all its strength and capabilities to create modern, advanced and innovative conditions for young people to get an education, acquire a profession, and grow into mature people. Because the more attention is paid to supporting the young generation in every way, raising them to be spiritually mature, physically healthy, patriotic and selfless, protecting their rights and interests, the more effective it will be. All the work, material and spiritual support and attention paid to young people will definitely show results. We believe in it. We will support the policy of our President regarding such young people, and we will be worthy children of our country and people. After all, the future of New Uzbekistan is in the hands of young people. To inculcate the ideas of

patriotism, humanity and truthfulness in our youth, who are the future of the new Uzbekistan. After all, education of a generation with a high intellectual potential is disappearing as one of the most important tasks not only in Uzbekistan, but also in the whole world. The future of the country will be determined by the spiritually perfect generation. Spiritual maturity is the most important factor in the development of society. After all, only healthy generations can build a healthy country. President Sh.M. Mirziyoyev often repeats this word: We have a great history worthy of envy. We have great ancestors who are worthy of envy. We have incomparable riches to covet. And I believe that if God wills, we will have a great enviable future. Therefore, we young people should only study, strive for our goals, and become worthy heirs of our highly spiritual ancestors.
