Abstract: *In this scientific article the the term "competitive economy" ref until a national economy that grows at a reasonable pace and proportionally, in which the necessary conditions for private entrepreneurship are created based on the laws of a market economy that serves to constantly improve living standards. An economic system is an open economic system in which production resources move freely and are regulated by a market mechanism.*

Keywords: *Competitive economy, national economy, entrepreneurship, market economy production resources, open economic system*

INTRODUCTION

of our country economics in development Uzbek model social economic potential, our people statehood history, national religious values and it was noted that it was developed taking into account world experience. Economics from politics superiority, of the state head reformer importance, the law priority strong social politics, market economy step by step transition famous five to the principle relied on this model market economy based on legal democratic state to build strategy as independence years all practical of work reliable the foundation, the driving force of development became a force.

BOOKS ANALYSIS AND METHODOLOGY

Our country president Shaukat Mirziyoyev by before pushed Five priority "Action Strategy" of the Republic of Uzbekistan in 2017-2021 In the way of strengthening the welfare of the people of Uzbekistan and the economic power of our country Continue the reforms implemented in our Republic at the new stage of development is making The above two since independence till now to the principle relied on without the economy developing people well-being providing is getting married. In the world innovative of the economy development today's in days paces with manifestation is happening. Innovative of the economy dynamic development trends i more fully meet consumer demand and modern economy in networks work high productivity level increase gives [1].

In the effective development of the economy of our republic, its traditional resources as an important alternative to the model based on techniques and technologies, science of science the end results and whole without society his life continuously rise provide in order to a person from the capital efficient to use directed transition to an innovative development strategy is of particular importance. Modern information technologies to innovative and integrated social economy - flexible, dynamic, effective, constantly updated, with new content and appearance innovative development strategy is suitable. Industrial sectors, in particular, modern networks innovative and integrated to develop too is relevant. of our economy competitiveness to be provided current in the day of our country one of the main pressing issues of sustainable development. National social and economic structural change and diversification for consistent reform to do deepening, innovative and integrated and high to technologies based on new industry in enterprises work release networks fast ensuring its development, modernization of operating facilities and innovative integrated modern technical update processes A prominent figurehead and leader in Janoch, who believes that it can only be achieved through acceleration the experience of countries shows. Competitive in terms of price and quality in the world market products work release necessary [2]. Currently national industry products work release diversification and his modern networks modernization the process of developing the material and technical base of the economic activity of its subjects level depends on because enterprises resource from potential efficient use a condition and main factor for ensuring economic growth and achieving stability is considered

DISCUSSION AND RESULTS

Country president Uzbekistan citizens for natural right and and speaking of the supreme blessing of independence, i.e. him society development base, today's and our long-term progress condition, all of our reforms criterion and finally, all action who does head principle that is described. Therefore, it is constantly presented to the members of the society in a new order state-building, political, fundamental social and economic reforms done increase, them the law with strengthening legal the system to the body had the task of bringing Because social relations typical of the former socialist system and the processes are now in the interests of the new society to be established in the Republic won't come was Ownership property ownership to do and him management, work release factors, the market mechanism, normalization of the socio-economic life of the state required such serious updates. Many in economic development areas were focused on. Including private property, entrepreneurship and small business many reforms were also

carried out for development. Private property, small business and ensuring reliable protection of private entrepreneurship, their rapid development within the framework of the implementation of the program of measures to eliminate obstacles on the way. During 2016, the establishment of the legislative and regulatory legal framework and its improvement works continue was made. In particular of construction all stages a single rule within the principles of the authorization procedure in the field of business activity requirements have been determined, changes in the appearance of buildings and structures, re-organization of objects economization and reconstruction to do stay places unstable places category requirements for the transfer permit were introduced. Carry out export-import operations in raising entrepreneurial operations done in raising entrepreneurship subjects rights protection to do guarantees and measures strengthened. Entrepreneurship during 2016 in order to support the activities and establish small enterprises 15.9 trillion soums of loans were allocated to small business subjects and the growth is expected to 2015 compared to 1.3 times. Including microloans worth 3.3 trillion soums separated, international finance of institutions 915 206.7 million dollar in quantity credit lines have been mastered. Creating a favorable business environment, small business and comprehensive support and further stimulation of private entrepreneurship about done being increased action measures 2016 year during almost 32 thousand new small business subject organize reach enable gave It is known Uzbekistan Energy production from renewable sources in the Republic is a high technique 97% of its potential is solar energy. Uzbekistan Republic of of the president 2019 year August 22 "Economy increase the energy efficiency of networks and the social sphere, energy saving introduction of technologies and development of renewable energy sources fast remedy events about". decision with there is from potentials efficient the share of renewable energy sources until 2030 for the purpose of use to reach more than 25 percent of the total volume of electricity production task was defined. For this, a total of 5000 MW of electricity will be required for 10 years stations to build in the eye caught. of the economy all in networks from water significantly increase the efficiency of use, on an area of up to 1 million hectares drop by drop irrigation technology current reach and them cultivated crops increase the yield of ho by 20-40 percent; Land degradation neutral to balanis reach; Main kind of village economy food products work is to achieve an increase in the average productivity of production up to 20-25 percent. That too to emphasize must next in years in our country family entrepreneurship to develop too separately attention being directed. This of families stable income It is decisive for the formation of the source and the

further improvement of the standard of living importance occupation reaches [3]. Uzbekistan Republic of "Family friendly entrepreneurship on" serves as the legal basis in this direction. "The people are rich if there is, the state will also be rich and powerful." to realize the principle of directed reforms consistent take is going An example for 2012 - in family entrepreneurship and craftsmanship development for, 2012 in family entrepreneurship and 91.3 billion soums of credit for the development of handicrafts if allocated, in 2016 this figure was 367.2 billion soums. Today's in the day in our country 8 out of a thousand more than family enterprises there is. Commerce banks bank to the public services show with together, them to entrepreneurship attraction to do , income increase, the work with in providing too efficient affairs take is going . Including the annual rate percentage of the loan given based on the jobs created in the projects decreased. 9 percent for an entrepreneur who created one job, creating two jobs 8 percent to create five or more jobs, the entrepreneur's loan rate is 6 percent was set as The purpose of these projects is to improve the well-being and livelihood of our people to further improve the conditions. No matter where you look, small business and private of entrepreneurship role and place more and more getting stronger going witness we will be In 2016, 56.9 percent of the country's 916 gross domestic product was produced 4.5 percent of industrial products are contributed by small business and private entrepreneurship will come. That's it with together, in economics total the work with busy has been of the population 78.1 percentage that's it in the field activity is running in 2016 31.8 a thousand small business subjects organize done. This 2015- of the year that's it from the time 18.1 percentage a lot means the world of the bank published on October 31, 2017 "Doing business 2018: jobs According to the report, Uzbekistan is among 190 countries of the world Taking the 74th place, it improved its position from last year by 13 places. In addition, our country is committed to creating the most favorable conditions for doing business reformer of states the first to ten to enter succeeded it has been. Practice ongoing reforms to improve Uzbekistan's entrepreneurship and doing business countries of the European and Central Asian region to simplify their conditions between to the leader to spin possibility gave Entrepreneurship of the subject state due to the radical improvement of the registration and accounting system Uzbekistan took 11th place in terms of enterprise registration. 1.3 times more during the 9 months of 2017 compared to the same period last year What is the cost of opening a business in our country? easy from being proof will give . Our country people from that glad to First our president Islam Karimov our country development on the way started efficient works, High determination is being continued with vigor. Our President

Shavkat Mirziyoyev good efforts, working night after night and day after day to everyone it is an example that very prosperous days are waiting for Uzbekistan in the future a tree will give. The economy development and of liberalization priority directions.

CONCLUSION

Current our day tomorrow thinking our country about thinking acceptance being done decrees, decisions and laws and take going wide scope reforms at the core too Uzbekistan new milestones is looking and our country own in development new to stage step from what he left a tree will give, this reforms own in turn, to increase the well-being and standard of living of the country's population is directed. President Shaukat Mirziyoyev Uzbekistan Republic acceptance done 25 anniversary dedicated solemn at the ceremony in his lecture as noted,"... entrepreneurship of activity freedom, private property inaccessibility In practice, provision has remained a priority in public policy ever since.... I would like to emphasize once again: the state is not an obstacle to the entrepreneur's path it should be accepted as a betrayal of his policy." After all, the President presented to the Oliy Majlis as noted in the appeal, he wants to see positive changes in his life today . Our hardworking, Our kind-hearted, tolerant people have full right to this" We are all for the development of our country being considered responsible, we will develop its economy for its perspective and prosperous life [4]. If our nation is satisfied with itself, its future will improve. of our country well-being upgrade, marriage conditions improve - main is our duty that emphasizes our president. Economical to prosperity achieved only in the state political to the height aspiration possible The economy without strengthening standing up the world on stage developed a political competitor to states can't be. Currently, the state owns providing the people with social living standards and monthly wages on time political with achieve consistency takes
