*Uzbekistan State university of
world languages 3rd grade students*

Annotation: *In today's modern world, attention to learning a foreign language is increasing day by day. Therefore, in this article, innovative technologies and some modern methods necessary for effective teaching of foreign languages, namely English, are analyzed. In addition, the importance of today's modern technologies and methods in language teaching and their role in improving the quality of education will be discussed.*

Key words: *foreign languages, modern technologies, interactive methods, multimedia,*

As time progressed, attention to languages also increased. Perfect learning of not only the mother tongue, but also foreign languages has become the need of the hour. In the era of information technologies, excellent knowledge of a foreign language has become one of the main requirements for high professional qualifications. It is not for nothing that special attention is paid to learning international communication languages. In the educational system of the Republic of Uzbekistan, foreign language teaching and learning is rising to a new level of quality based on the scientific approach and the introduction of new information and communication and pedagogical technologies that fully meet the requirements of the time. All conditions and opportunities have been created for the education of the growing young generation in a comprehensive manner, for their thorough acquisition of modern knowledge and skills. During these reforms, special attention was paid to teaching foreign languages. The socio-pedagogical necessity of an innovative approach to education is measured by:

1. Scientific-technical development and socio-economic renewal of the continuous education system, in particular, improvement of the educational process in educational institutions using the study of advanced foreign experiences, innovative approaches in education and information technologies;

2. Creation and implementation of effective organizational forms and technologies of person-oriented education that serve to develop the level of education, intellectual potential, social activity, and creativity skills of students;

3. The need to develop the professional-innovative competence of the teacher in relation to mastering and implementing pedagogical innovations.

An important factor in the use of modern technologies in the educational process is that students know and use information and communication technologies well. Teaching and learning a foreign language using modern technologies is one of the most fruitful ways. In this process, including:

- when using computers, the student can watch and listen to foreign language videos, shows, dialogues, movies or cartoons;

- > you can listen and watch foreign language radio broadcasts and television programs;

- use of tape recorders and cassettes, which is considered a more traditional method;

- CD players are available. The use of these technical tools makes the process of learning a foreign language more interesting and effective for students.

In the current educational process, the student should be the subject. Focusing on more interactive methods will increase the effectiveness of education. One of the most important requirements for English language classes is to teach students to think independently. Today, English language teachers are using the following innovative methods based on the experience of pedagogues from the United States of America and England:

“Creative Problem Solving” to apply this method the beginning of the story is read, how it ends, readers, students the judgment is referred to;

“Quick answers” (Quick answers) help to improve the effectiveness of the lesson:

“Warm-up exercises” use various games in the classroom to make students interested in the lesson;

„Pantomime» (pantomime) is a method where very difficult topics need to be explained it can be used in class or when written exercises are done and students are tired;

“A chain story” method helps to develop oral speech of students will give;

“Acting characters” method can be used in all types of lessons:

“Thinkers meeting” poets and writers can be invited.

At such a time, using the words of wisdom they said in the lesson will help young people to be educated as perfect people; “When pictures speak” method is more convenient and English helps in teaching, in the development of oral speech of students:

To improve the quality of education, technical means: audio-video, film materials, computers, video projector, slides, excerpts from artistic works, modern pedagogical technologies, in particular interactive methods, are used appropriately. Innovative educational technologies improve the quality of education, increase its effectiveness, establish mutual cooperation between the teacher, student, and the team, ideological and necessary conditions for achieving spiritual unity, striving towards a single goal, realizing the inner potential of each learner, manifesting as a person and has great potential in creating an environment.

In conclusion, as we live in the era of advanced information technologies, it is necessary to teach foreign languages in a way that is understandable for everyone, using these facilities wisely. Therefore, introducing technologies, ensuring that teaching methods meet the requirements of the time are the main tasks of pedagogues-scientists that cannot be delayed. Training of specialists and improvement of their qualifications is also relevant. While the economic, political, cultural and educational relations of our country with the countries of the world are growing, the interest of our youth in the life, culture, customs, and language of foreign countries is increasing. The role of foreign languages in the development of these relations is incomparable.
