

JANUARY 14 IS DEFENDER OF THE FATHERLAND DAY

Karimov Ravshan Abdufattayevich*Faculty of military education of FarDu deputy dean*

Annotation: *the article examines the problem of patriotic education through the prism of the national and cultural experience of Uzbek history. The phenomenon of patriotism manifests itself in the interests of the Fatherland as its active social significance aega, one of the most important, lasting values of society, based on the highest level of development of all macro features embodied in the perception of a person.*

Keywords: *patriotism, independence, state, history, national consciousness, national culture.*

Further strengthening national independence, ensuring the succession of ancestors-generations is a necessary requirement to ensure the stability of the social progress of each people and each state

This issue - has a political-legal nature and has historical significance. Patriotism is an integral part of the policy of every independent state and independent state, and one of its priorities in today's turbulent times. Because, despite the fact that by the end of the 20th century, the world's bipolar world political order, represented in a multipolar, multi-variant, scientific language, opened the way to synergetikporodigma, the expansionist and cosmolytic policies of the leading world dalats for hegemony in the world could not fail. Today, the spirit of being a hegemon on a global scale, of leadership, did not leave the psyche of some progressive states. Regional and local disputes, civil wars, various "color revolutions" observed at different points of the bunijahan confirm.

Uzbekistan entered into international market relations, as did the peoples of the world. This process is deepening and expanding day and year after year. Achieving a high standard of Living, Living a comfortable life "like people" is the Supreme dream of every citizen. For the past 30 years of independence, a policy of consistent, targeted and targeted social protection of the population, especially in relation to the layers in need of material protection, has been applied. This is also a manifestation of patriotism. With the dry word "homeland", a person is not satisfied with "Homeland" -a social space where there are necessary conditions, opportunities for a person to live as a person. Patriotism is the place where a person is born and raised by himself, educated, able to learn, where his dreams come true, God. He is loved by man, he does not exchange it for other lands, he contributes to its development, exalts it, protects it from destructive forces, protects it, selflessly sacrifices its life. The motherland is seen from the human mind, loves. Therefore, the concepts of "Homeland" and "mother" are synonymous, identical concepts for literate, enlightened people. To feel this, a person will have to

realize his national identity. Patriotism is the Supreme feeling associated with the perception of the political self.

Patriotism is an expression of enlightenment, literacy and awareness, both on a national and universal level. Patriotism is not capriciousness, not memory. The familiar, the feeling of the motherland is equal to the familiar, the feeling of the mother. Patriotism is a secular concept. In Uzbekistan, since 2017, attention has increased to the issue of Homeland - care, in particular military patriotism. In this case, the initiatives of President Shavkat Mirziyoyev are significant.

The patriotism of our youth is tested in military competitions, not on the battlefield in a calm, stable time. Today, the indicators of Uzbek teams in the tank Biathlon, special services Sox, radio communication and other Sox in military games are pleasing-they are taking proud places in international military competitions. Behind such achievements lies the hard work of modern Personnel Selection and training.

In this achievement, the contribution of the military command is great, in the world military sphere, what change and achievement will not go unnoticed, a timely, rapid innovation, modernization policy will not be carried out. Today, the world military exports in matigas the Armed Forces of Uzbekistan are the leading military force in the Central Asian region with sufficient potential. He is able to adequately respond to any type of military attack. Uzbekarbi's servants are becoming confident in the independence of this motherland, the tranquility of the land, the peaceful creation of our people and the continuation of the work of the establishment freely, without prejudice, the work towards the well-being of our country.

1. Patriotism is a social, historical phenomenon. Its history is associated with the periods of the early formation of the state and society. A person lives and grows up in society. Protecting one's own society, ensuring that one lives a stable life, resorting to external risks, requires human literacy. For this reason it must be that today's political science is one of the "fathers" of political science, an ancient Greek thinker, who, as he describes it to my Godam, said it is a "social animal" or political being. This means-if a person is guided-masa he will be stuck in the world of his instincts. The main factor that makes a person human is society. In ancient Polis-cities, states, the concepts of "society" and "state" were considered synonymous. Therefore, "patriotism" is understood at the same time as involvement, affiliation, social presence in the life, fate of the state and society.

2. Patriotism is a national and universal value. This is due to the fact that society is a universal quality associated with the requirements of spirituality and morality. Patriotism, which has many examples of patriotism from history, is glorified not only in scientific sources, but also in folk oral creativity, folklore, ethnomathery. Art also reflects patriotism in high human virtue and value.

3. Patriotism is not formed in a person on its own. Patriotism is considered a phenomenon associated with the perception of humanity. Self-awareness is a multistage

and multilevel host. The highest, highest stage of human self – awareness is political self-awareness. With this stage, the patriotism that we are laying down is associated with the study of the genius of man for social work, for the prosperity and fate of the motherland.

4. Patriotism is associated with the scientific, moral, political, legal and religious orientation of a person, his development. Therefore, patriotism is strictly vamtazam education and upbringing. The appearance of patriotism in the wilderness is military patriotism. It is the worldview, faith and immunity of military patriotism that will help today's young generation to realize the Moxies, value and importance of national independence.
