student of Foreign languages faculty of Bukhara State University

Abstract: This article provides detailed information about the importance of learning foreign languages and applying them in a real life. Learning new language is valuable skill that offers numerous benefits both personally and professionally. In today's globalized world, the ability to communicate in multiple languages can open up new opportunities and enhance cultural understanding. The language department has created a part of the European documents in the field of education. The main factors are determined by the increase in competition and economic growth. Moreover, students expand opportunities to clarify the effective methods, techniques and materials which are necessary in applied linguistics.

Key words: Foreign languages, Damirel , memory, critical thinking , European documents, personal growth and cultural awareness, in business partnership.

Without any doubt, today's world demands effective communication on both native and foreign languages . To communicate appropriately means that the ability to speak, understand, read and write. However, the most significant way to learn and comprehend deeply, demonstrate contribution and show enthusiasm between people. It is obvious that, inadequate communication and shortage of acceptance can negatively impact on the cognitive skills in all developmental periods of human being existence and performance. Every person should have the ability to show argument to be approved by someone and to be perceived. To know foreign languages in this way, means that to accomplish procedure for effective communication, boost lifelong learning that stimulate teacher student relationships. According to the scientific studies of Damirel {2005:41}, he described an education in his three articles which had already become inseparable part of social life. In the first one, the process of modifying person's temperament, next one is about evolving person's behavior through his or her own actions, the last one is concerned about gaining experience and knowledge which are essential for personal development. When it comes to the effective methods of qualified education explained is the way to construct a suitable learning environment for individuals. A positive learning environment is the one where students feel involved and responsible for their learning while being comfortable enough to fully take part in a group and individual activities. However, every student cannot learn at the same level and at the same quality. This

occasion is known to be caused by several factors like interest, expectation, learning style, age, gender and so on.

When it comes to the importance of learning foreign languages boost our memory, critical thinking and problem-solving skills. Students also showed that being multilingual is crucial for 21st century. Learning a second language sure opens doors to greater capabilities in the future career. Employers would actually prefer employees who are able to communicate fluently. Another influential feature of learning languages will destroy berries when you face in your personal and social life of course, you can easily contact and gain inner and outer learning strategy aid targeted to identify the methods most frequently employed by language learners. { Chamot, 2004, Magogwe and Oliver, 2007}. But Chamot identified that different strategies were described by students in a various cultures. In this strategy, Chinese and Singaporean students showed high level preference and lower than the European students.

According to the information in the Youth 2010 survey have a great difference compared to the research a decade year ago, which had clearly defined population {Youth, 2010}. It is obvious that Slovenian youth has a better memory and sociable skills of foreign languages. There are also a few key documents that outline language learning goals and levels at the European assessment level. They are:

A] Common European Framework of Reference for languages {CEFR}. It is aimed to evaluate learner's achievement in foreign languages across Europe.

B] European Language Portfolio {ELP} is about the reflection of learners. It assists students to set goals and assess their development. These documents are essential for advocating multilingualism across Europe. The reasons for learning foreign languages:

1. Enhanced communication. Learning languages in these days is the main key to open the doors for personal and professional lives. It is the ability to communicate with people from different cultures and build up relationships.

2. Career development. In business or labour market, the employers need well-educated staffs with the knowledge of foreign languages not only English, but also the language that are essential in 21st century. It leads to the development of competitiveness and job opportunities. In order to improve employable and sufficient workforce to possess higher-level actually, foreign language competences are in the foundations of those qualification.

3. Personal growth and cultural awareness. Through learning languages, individuals can appreciate and respect other cultures, fostering empathy and understanding across borders. In other words, to communicate in an another language or mastering it, gives you a sense of accomplishment and belief.

4. Cognitive benefits. In accordance with the last survey, researchers observed that in adults have a strong ability to acquire new languages and potentially combat to age-associated disorders. Language learning and its usage captures wide-ranging neural

network that covers frontal, temporal and parietal parts of a brain {Antoniou, et al, 2013} and this network also covers a network of aging and cognitive decline {Backman et al, 2010; Gunning-Dixon & Raz, 2003}, foreign language training would also supplying with cognitive benefits{Bak et al, 2016}.

Furthermore, research indicates that students who master a second language tend to show better standardized skills, develop stronger analytical skills and have a higher academic accomplishment. The importance if learning foreign language can boost literacy skills including reading, comprehension, vocabulary range, writing and reading skills. Bilingual individuals show high results in terms of linguistic repertoire and better understanding of structures. The scientific information highlights that the intense profits of learning foreign languages, focusing on how it can influence cognitive, social and academic outcomes. Some key areas where the importance of languages are particularly vital include:

1. Diplomacy and international relations: Foreign language skills are essential for diplomats , international relations, professionals and for government. Proficiency in multiple languages enables effective communication. Because they highly value partners who can speak easily and fluently.

2. Education and Academia. There is a strong belief that learning languages improve student's writing, reading and speaking, also help them to be creative and flexible thinkers. According to Canadian Centre of science and education mentioned that," the effects of foreign language learning on creativity found that the effectiveness in fluency, elaboration and flexibility. Children who are exposed to languages grow up to become open-minded" says Fay School's World language Chair Kara Mertz.

3. Study abroad opportunities. Many universities offer studying abroad and gaining qualification which provide immersive language learning experiences. Proficiency in a foreign language can significantly improve the quality of study and fully engage with the culture and academic environment. Academically literate students' mind will be equipped with the scholarly literature, research findings and academic discourse.

The significance of foreign languages in the business world also necessary tool for international implementation of business strategies. These methods not only for international companies but also for small enterprises which are all of them included the importance of international business. In addition, 65% of international companies in the world are conducted in English, because of the power of the USA and it is concluded by Robert Pitch {Pitch, 1987, pp;1} in the forthcoming words: " In an international competition which getting harsher and harsher, success can be achieved only by somebody who is able to recognize and apply culture and effects of customers, partners and to transfer them into his own personal interests".

A. Danish's study {Ronh of, 2010, pp,64} demonstrates that 4 out 10 firms that use standardization which means the use of English as a lingua franca , have communication

problems due to partner's lack of knowledge of English. In the business world, knowledge of English language leads to mutual understanding and long-term compromises between partners.

Overall, learning foreign languages has a great a great benefit to our lives. The ideas and findings from researchers underscore the profound benefits and implications of learning foreign languages, promoting the cognitive, social, academic advantages of multilingualism. Another factor is the increasing interconnectedness of global economy and cultural diversity.
