Abstract: *There is probably no person in this world who does not love his country, his motherland, who does not yearn for him when he goes far away. Feelings of loyalty and self-sacrifice in a person's heart also arise from love for one's country. The most beautiful buildings and structures in the world were born from the power of such love, and they stand forever as a symbol of loyalty and dedication to the Motherland. In this regard, I want to write about the years of independence, which ensured our free and prosperous life, not thousands of years.*

Key words: *Motherland, feeling, loyalty, dedication, independence, our people, hardworking, high, our future, human, creativity, work, mission.*

That is, when the poet sings his feelings for the Motherland burning in his poems, the builder rises from the ground and creates various buildings and structures that are a sight for every city and village, streets and avenues, peaceful resting places. Master teachers educate boys and girls who take various professions and serve this country faithfully, doctors take care of the health of such people, etc.

We are witnessing, seeing and rejoicing in the years of independence. Our sons and daughters who were born in the years of independence are now of the same age. They are working tirelessly for this country, for the fatherland, they are studying, creating new inventions, raising the flag of Uzbekistan high on the sports podiums, glorifying the honor and dignity of the country.

In the decision of the President of the Republic of Uzbekistan "On the preparation and holding of the thirty-first anniversary of the State Independence of the Republic of Uzbekistan", the value of the priceless blessing of independence, which our people have strived for and fought for for centuries, - to deeply understand the value, to convey to our country and the world community the essence and importance of our difficult and difficult and at the same time honorable path, our large-scale reforms, and our great achievements. To deliver, to put it simply, to understand who we were yesterday and who we are today, to inspire our compatriots to new goals, to celebrate the greatest and dearest day for us, the Independence Day, at a high level.

Especially in the resolution, the image of our country, cities and villages is opening year by year, becoming more and more prosperous and beautiful, including the social

significance of the programs being introduced to establish modern housing and infrastructure networks based on model projects in rural areas. tasks are also set.

The result of the opportunities given by independence is a free and prosperous life, the well-being of the population, creativity, summarizing the changes that are happening rapidly before the holiday is an honorable task. It is possible to create a wide range of works, not just one article on each field.« Today our country is on the verge of great changes. It should not be forgotten that the people of Karakalpak have always been considered one of the pillars of our country, and we always look at your potential with unlimited confidence."

There is no doubt that such high confidence of our President in the people of Uzbekistan will make our country more prosperous and our life more comfortable. All this is reflected in the creative work being carried out in Uzbekistan today. Homeland begins at the threshold. As soon as a person is born, his duties and responsibilities to the country come with him. Every person should live his life not by "what the country gave me", but by "what I gave to my country".

While the child is still in the mother's womb, he feels the external environment. According to experts, it would be beneficial for a pregnant woman to speak more loudly and read literature about different countries. Also, it is appropriate to inculcate the love for the motherland in the unborn child before it is actually born.

Motherland is compared to mother. We have come across the phrase "motherland" a lot in many literatures. Our mother is so holy for us. They say "heaven is under the feet of mothers". Our lives are not enough to repay the debt of how much our mothers have given us. Have you ever thought that a mother is not only physically but also mentally exhausted to give birth to her child? Our great religion of Islam emphasized our duty to mothers. Unfortunately, today the merchant is forgetting his duty to his parents. At the same time, I think that the answer given by one of the Companions to the question of our Prophet Muhammad (pbuh) is worthy of praise.

Our duty and mission to our mother must be combined with our love for the motherland. We were born and grew up in this country, so let's spare no effort and knowledge for the development of the country. Including, we need to pay more attention to our women. Their position should not fall to the 2nd level. After all, they say "a woman rocks the cradle with one hand and the world with the other." A country that respects women does not discriminate.

It is necessary to contribute to the development of the country, keeping in mind the slogan "we do not share less than anyone, we are not less". Isn't this holy homeland ours? I think it is our duty to love him like a ember. This homeland, this country is yours, mine, his, not this one's, it belongs to all of us. I think I should also write this. It is not a secret to all of us that nowadays many of our countrymen are in the old-fashioned mood. I think that if we give the necessary help to our compatriots, it would

be a great light. After all, he blesses the land. But let's not use our profession as a weapon for our own benefit.

In many countries, family breakdowns occur for trivial reasons. And this does not leave our homeland. As a result, many of the children remain orphans. This seriously affects the future of children. It is possible that people with different goals will try to divide the orphan child and fill the empty space. Let's fill this gap in the spirit of patriotism. Let's be kind to each other. After all, children can show their love for their country after seeing the love in the family. What remains of us humans is a good name. Even Alexander the Great came out of his coffin singing from his death. Isn't Alexander's life a lesson for us?

He did great things for his country. I consider this one act of his to be an example for the future. Currently, reforms are underway on many fronts. I want to focus the attention of our compatriots on ecological culture. Let's not ignore it and throw an ax into the future. I would like to pay attention to the patriotism in remote areas. I think that if we take a stand on this issue, we will be able to instill patriotic feelings in the young generation. Only then would we achieve victory in this field. Any suffering in the path of victory is sacred. I believe that if a sports complex and a cozy library are built in the most prominent areas of the neighborhoods, young people who can contribute to the development of the country will grow up. Because if we do not start the development of the country with the education of young people, it may lead to bad consequences in the future. Our grandfather Abdulla Avloni did not say for nothing a century ago that "education is a matter of life or death for us, or salvation or destruction, or happiness or disaster." We will achieve our goal if we spend our money on the future of our youth and not on whims and fancies.

In conclusion, I can say that this dear and holy country was not created for you and us yesterday or today. This holy homeland is a legacy from great ancestors to generations. Therefore, it is our duty to contribute to the development of our country, as little or as much as we can. I wish I could make a little change in the life of my country through this blockpost. It was the greatest happiness for me.
