

IMPROVEMENT OF ORGANIZATIONAL AND ECONOMIC MECHANISMS OF THE ACTIVITY OF SMALL BUSINESS IN THE DEVELOPMENT OF THE ECONOMY

senior lecturer I.M. Kamoliddinov

Namangan Institute of Engineering and Technology

Abstract: *The article deals with issues related to the improvement of the organizational and economic mechanisms of small business in the development of the economy, ensuring employment of the population through the creation of new jobs, as well as factors that serve to improve the well-being of people.*

Keywords: *entrepreneurship, investment, business, environment, entrepreneurial activity, foreign investment, innovative economy, economic mechanism, innovative culture, investment system*

As President Sh.M. Mirziyoyev noted: “We need to educate business people who are able to produce competitive products, and most importantly, create new jobs and provide for themselves and their families, but also educate people who bring competitive products to the market. "In order to expand the ranks of such entrepreneurs, our primary task is to bring and introduce high technologies, machinery and equipment based on the latest achievements of science to our country.

At present, in the year of the "Development of Science and the Digital Economy", it is necessary to organize the activities of small businesses based on innovative and modern approaches, advanced technologies and management methods.

In addition, in order to continue financial support for small businesses and private entrepreneurship in the economy of the industry in subsequent years, as part of creating a more favorable business environment in our country, organizational and economic mechanisms for the development of small businesses and the digital economy in this area were developed, financial and credit resources for participants in this sector ensures widespread use.

Therefore, in an economy based on market relations, entrepreneurship is seen as an economic resource and a component of the human factor.

The development of enterprises developing on the basis of competition in regional markets ensures the formation of the structure and types of products in accordance with consumer demand by reducing the cost of production.

We know that the effectiveness of economic activity depends on the correct choice of the direction of the economy, the most efficient and economical, and the correct pricing of goods prepared for consumers.

In the course of the economic reforms being carried out in our republic, the modernization of the country, ensuring the competitiveness of the economy, improving the organization, improving the organizational and economic mechanisms of small

business in the development of engineering in all aspects, work in this direction continues consistently. of great importance is the improvement of industrial and business relations based on supply and demand, which are closely related to each other. The main ones are as follows;

- apply measures to improve the structure of economic entities operating in the areas of activity, especially in industry, in the organization of modern industries that require high technology, find various ways and measures to stimulate the development of entrepreneurship; advanced achievements of science;

- it is necessary to expand their participation in the field of foreign economic activity through clear and effective support for economic entities that produce products for export in the regions.

With this in mind, large-scale work is being carried out in our country in the field of export of economic entities to develop the economy. Further expansion of the export potential of small enterprises and private enterprises in the field of production, increasing the production of modern, competitive products in foreign markets and providing them with the necessary legal, financial and organizational support for export, ensuring reliable protection of our country's exporting entrepreneurs from aggression. the risk of changes in the external market in order to improve the organizational and economic mechanisms for the development of small businesses.

In conclusion, we consider it appropriate to develop the following conclusions and proposals for improving the organizational and economic mechanisms for the development of small business:

1. Regularly study and take measures to eliminate problems that hinder or may hinder the effective operation of small businesses and private entrepreneurship in the field of production in the regions.

2. Effectively organize the processes of obtaining reliable information about free buildings and structures in the region and providing them to small businesses and private entrepreneurship.

Based on the foregoing, we believe that the improvement of the organizational and economic mechanisms of small business in the development of production will create the basis for the stable growth of the national economy and its entry into the global competitive commodity market.
