Annotation: *this article tried to highlight the issues of large-scale reforms carried out by the head of state to educate young people in the spirit of military patriotism, interest them in becoming military professionals, strengthen the defense potential of our country and preserve peace in our country.*

Keywords: *military patriotism, innovation knowledge, Action Strategy, information and communication technologies, modeling techniques.*

Youth is the future of our homeland and our nation. Since the fate of our homeland is entrusted to young people, first of all they need to deeply understand in all its essence the complex and responsible task assigned to them, to contribute themselves to it. After all, love for the motherland, love for it is determined directly by the ingenious work that everyone is doing on the way to the prosperity of this land. One of the important tasks of the pedagogical teams of military educational institutions is to raise the military-patriotic education of young people, to prepare them comprehensively for military service, to fulfill their duties in protecting their homeland-the Republic of Uzbekistan. At this point, it is significant both at the recently established Military-Technical Institute of the National Guard and precisely for the fact that in the future it is aimed at training highly qualified, patriotic personnel for our army. At this institute, it is necessary to equip cadets with the most advanced, innovative knowledge and skills, modern information and communication technologies, modern technical educational tools based on modeling techniques and training equipment that provide them with the most complete adaptation possible to combat situations. Kata is also focused on important issues such as the basic principles and methods of conducting combat operas during theoretical and practical training, the effective organization and

planning of combat training events, the use of modern weapons and military equipment, and in – depth study of foreign languages. As our honored President said about this, “highly qualified ready-made personnel for our Army, if necessary, the reserve of candidates at the level of commanders of the armed forces should be matured precisely from this educational institution,” places great responsibility on the team of professors and teachers operating at the Institute.

Indeed, one of the most important areas of military-patriotic education implemented in the military field is to introduce personal content to the internal and foreign policy of the Republic of Uzbekistan, the changes taking place in the economy, science, culture, social sphere and, as such, to form such qualities as love for the motherland to the military, pride, national pride, It is necessary that our young people who are undergoing military service in the ranks of our national army not only thoroughly master the secrets of the military sphere, but at the same time become patriotic, brave, courageous people, realizing that it is a sacred duty to protect their mother, their people, ensure the inviolability of borders. As the head of our state, the Supreme Commander-in-chief of the Armed Forces noted: “... such a situation can lead to extremely unpleasant consequences if the personal composition is spiritually weak, that is, in our soldiers and offices there is no fighting spirit, kindness and loyalty to the motherland, responsibility for its fate, or negligence prevails between them,” more responsible for our military. In keeping with these views, grandpa Sahibqiran Amir Temur also expressed the following views: “there is no more severe kulfat than not being able to properly assess Ghanim. To avoid mistakes, I did every job with a lot of thought, soberness and caution,” the thoughts of which still serve as a school for our military personnel today. Fortunately, today the army is organized on a completely new, modern and highly spiritual basis. He became an or-Nomus, honor, protector of the nobility of the nation, a great protecting power. Today, the honor army of our independent homeland has become a school of life in the real sense for sons of the age of military service. Therefore, young people consider it a sacred duty to serve their native land. At the same time, as noted by our President Shavkat Mirziyoyev in his speeches at the Security Council meeting on January 10, 2018 on “our Armed Forces are a solid guarantee of the stability and progress of our country”：“...the strengthening of the defense potential of our country has been identified as one of the priorities of the strategy of Action for the development of Uzbekistan. According to the strategy, in 2017, large-scale changes were made to military construction, among other areas. In the short term, we have achieved the first tangible results and developed a strategic approach to our renewed armed forces,” and the reforms, renewal and changes in our national army are equally pleasing to everyone living in this country - young and old. The decision of the president of the Republic of Uzbekistan, Supreme Commander-In-Chief of the Armed Forces

Shavkat Mirziyoyev on the military sphere, the benefits and favorable conditions created for military personnel, the provision of long-term preferential mortgage loans on their housing, the provision of preferential trips to oil educational institutions for young people serving in the military, continuous holding of propaganda events in districts, cities, labor communities, Remote-remote neighborhoods and settlements in order to educate students and students in the spirit of military patriotism by strengthening the defense potential of our country and widely promoting the essence of the large-scale work carried out by the state to preserve peace in our country allows us to educate young people in the spirit of In addition, in order to further increase the interest of young people in the military profession in military units, educational institutions, to mature patriotic qualities, the organization of meetings and round tables representing historical heroes Toomaris, Shiroq, Spitamen, patriotism from our great ancestors Jaloliddin Manguberdi, Amir Temur, Babur Mirza's life and work, courage, combat tactics and promoting their patriotism gives a big positive result. In addition, in order to widely promote the content of the lectures of the head of the Supreme Commander-in-chief of the Armed Forces on the military sphere among young people and to carry out innovations in the military sphere among young people, in educational institutions in all regions of our country, "let's become worthy successors to generations", "let's know that the homeland awaits you, student and student-serve as one of the most fundamental factors in educating young people in the spirit of military patriotism. Another important issue of the present day is the selection of worthy among the youth conscripted for term military service at the call-up and meeting points of the Departments of Defense, the interest of young people in serving the sacred duty of protecting the motherland, the orientation of the honorable task of becoming a military professional and ensuring the transparent and fair passage of the work of

As the head of our state, the Supreme Commander-in-chief of the Armed Forces, said: "the fact that today our national army has become a real School of courage, dedication, true patriotism for thousands or thousands of our sons is undoubtedly the greatest achievement we have achieved along the way. This fact is recognized by all parents in our country, all our people with pride, with gratitude.
