

**THE IMPORTANCE OF DIGITAL TECHNOLOGIES IN TEACHING FOREIGN LANGUAGES.**

**Mirzakamolova Sadoqatxon Sayidaxmedovna**

*Teacher of Navai State Pedagogical Institute*

**G'afforova Asila Kamol qizi**

*Student of Navai State Pedagogical Institute*

**Annotation:** *As 21st century is the globalization and developing age, we cannot imagine every field of our life without technology. Using technology in class and after class has become the most important part of the learning and teaching process. Teachers use them to adopt classroom activities and attract the students' attention, thus increase language learning process. As Craig R. Barrett mentions "With the help of technology teachers will be leaders in the transformation of education around the world".*

*We have a lot of choice to choose from the world of technology in language teaching and learning .We can mention computers, TV, phone, language laboratory, Internet, e-mail, CD rom as the most effective ones. Moreover Mobile applications also give great advantage in the process of learning and teaching.*

*In the field of education the technological development open a new page, I mean today traditional methods of teaching are not giving good impact on the learners. Teaching with technology become the source of motivating students and a tool for motivating students to be innovative. This study focuses on the using new technologies in learning and teaching language and in this article I inform you about types of technologies, how to use them to improve language skills, advantages of technology and the effectiveness of mobile apps in learning and teaching.*

**Key words:** *Teaching and learning, ICT, Apps, types of technologies, digital technologies, devices, digital tools.*

*These days in each branch of our life is changing into connected with digital technologies and it's not excepted from the method of education. Throughout the education amount at faculties, universities or at kindergartens we have a tendency to use them as an academic tool. initial and foremost, it might be higher if we have a tendency to answer the subsequent question what's the digital technologies itself?*

*Graddol said that "Technology lies at the heart of the globalization process affecting education, work and culture. The use of English language*

has increased rapidly after 1960. At present the role and states of English language is that it is the language of social context, political, sociocultural business, education, library, communication across borders and key subject in curriculum and language of importing education” When technology enter to education the system of teaching changed dramatically, it means todays teachers are required to be aware of new technologies step by step.

As Bull and Ma stated “Technology provides, offers unlimited recourses to language learners”. We know computers as a main resource of technology and according to Becker (2000) computers are regarded as an important instructional instrument in language classes in which teachers have a convenient access is sufficiently prepared and have some freedom in the curriculum. Computer technology is regarded by a lot of teachers to be a significant part of providing a high quality education”. It is true that using computers in a class is a good way to teach effectively, give attention to students work in the same time, and check the assignments quickly. Jenifer Alemeng said that “Teaching in the internet age means we must teach tomorrows skills today”.

In addition, The Internet is an important part of technology. Connecting with websites where we can find more information in a quick way increase students interests again and again. On the other hand, teacher and parents should give attention while students using internet.

Moreover, Internet give the chance for people learn language not only at class but also at home which save time and energy without need of going somewhere, and any time they want.

One example of technology is E-mail. Through this new tech we can take assignments from teachers and exchange our ideas with friends.

Television is one of the important tool for learning language and improving both listening and reading skills. It is differ from tape recorder which help us to listen records, through television we watch the acts of people, which make easier to understand the new words meaning.

Today we cannot imagine our life without mobile phones, which we can carry it all the time in our pocket or hand. It is little computer that can do every function of computer. In mobile phone helped language learning we can find probability, social interactivity, community, individuality and immediacy as S. Ammani and U. Aparanjani mentioned.

Information technology has given rise to various tools and applications which can be used by educational administration and teachers to track the progress of individual students and the parents can also be kept up to date about the achievement of their children. Even though, the mobile App

development with IT has made education fun and exciting. The mobile apps can be utilized in many ways in educating people. There are so many advantages of using mobile apps in our daily life. There are many advantages of Apps in language learning.

First of all it enhance classroom performance. Learning through mobile apps like Seesaw helps students to improve their knowledge and to control aspects of their education. After class students can go through the lecture as many times they want and in this way they student can understand the theme fully without anybody`s help.

Then they help to control time. Students do not waste their time with unnecessary activities, instead of it they can read e-books, listen recorded lectures or do home assignments.

It helps students to improve technological skills which is the demand of today`s modern world. The more students work with apps , the more they will be good at technology world when they move on to the workplace.

Apps make learning fun. Sometimes reading the assignment, answering to questions, recording voice is boring. But with games it will be more interesting. Sometimes difficult tasks become more fun with games. For instance the top language learning apps help the students with new words and sentence formation by making any funny games. By introducing competitions and rewards motivate students to learn deeper the topic and Brilliant is might be an example for the best mobile app .

Apps are a good chance to learn individually. In a class with 30 or 40 student are taught by teacher, because it is impossible to give attention all the students in 40 minutes for teacher. By downloading the lesson to app open a way to learn individually to students.

Moreover, sometimes every student cannot discuss his problems in learning with teacher ,which is related to topic. If students need to talk with teacher and vise versa, apps make it easy for students and teacher to connect.

Digital technologies area unit electronic tools, devices, systems, and resources that generated, store or method knowledge. Digital tools embody social media, mobile phones, on-line games, and multimedia system. The effective use of digital learning tools in lecture rooms will increase student engagement, facilitate lecturers improve their lesson plans, and facilitate personalized learning. It additionally helps students to create essential 21st-century skills.

Teachers need to develop student performance, and technology might facilitate them implement this goal. To mitigate the challenges, directors

should facilitate lecturers collect the competencies required to boost learning for college students by technology. Additionally, technology within the schoolroom ought to create teachers' jobs easier while not adding time beyond regulation to their day.

Technology provides learners with easy-to-access knowledge, accelerated learning, and fun possibilities to apply what they learn. It permits students to explore new subjects and deepen their comprehension of exhausting ideas, particularly in stem. Through the alter of technology within and out of doors the schoolroom, students may gain 21st-century technical skills necessary for future occupations.

Still, kids learn additional effectively with instruction. The planet Economic Forum reports that whereas technology will facilitate young students learn and acquire data through play, as an example, proof suggests that learning is simpler through steerage from associate adult, like a coach.

Leaders and directors ought to size up of wherever their college area unit in terms of their understanding of on-line areas. From lessons learned throughout this troubled time, they'll implement solutions currently for the long run. As an example, directors might provide lecturers per week or 2 to think twice regarding the way to teach courses not antecedently on-line. Additionally, to a research of solutions, flexibility throughout these making an attempt times is of predominate importance.

As a coach we are able to use some instructional apps to create effective progress in learning method and people apps embody telephone programs that may be used and incontestable on good TV of sophistication. They are duolingo, quizlet and other alternative helpful tools that have become one in all the highest method of learning a remote language.

In order to grant example for those instructional apps I need to settle on duolingo to supply you, readers, with some awareness regarding them. Firstly, you must enter your g-mail or e-mail to start out your activities and so you'll run a listing of languages that area unit accessible to start learning one in all them. at that time, you'll decide your daily goal that you just are busy with it. There are a unit even given some stories and that they can develop the amount of learners from straightforward to advanced. Besides them you'll be able to mark yourself by seeing your improvement method.

As a conclusion I will say that the vitality of digital technologies within the sphere of education is painfully widened in today's day. It helps learners to increase their data will lighten lecturers work likewise.
